

MUHAMMAD GULSHAIR

Full Stack Developer | MERN | React • Node.js • TypeScript

Email: mgulshair088@gmail.com | LinkedIn: linkedin.com/in/gulshair12 | GitHub: github.com/gulshair12

Portfolio: gulshair12.netlify.app | Phone: +92 320 0775896 | Location: Lahore, Pakistan

Professional Summary

Full Stack Developer with 4 years of experience building end-to-end MERN applications and scalable web systems. Expert in frontend architecture (React, Next.js) and backend development (Node.js, Express). Proficient with both SQL and NoSQL databases, building performant APIs, and implementing modern fullstack patterns including SSR, CSR, and serverless architectures. Experienced with GraphQL, REST APIs, microservices, and AI-assisted development workflows. Proven track record designing and scaling systems for production environments.

Education

COMSATS University Islamabad

September 2018 - May 2022

Bachelor of Science in Computer Science

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Redux Toolkit, TanStack Query

Backend: Node.js, Express, REST APIs, GraphQL, SSR, Microservices

Databases: MongoDB, PostgreSQL, SQL, NoSQL, Supabase, Firebase

UI & Styling: Tailwind CSS, Material UI, Shadcn UI, Bootstrap, Responsive Design, WCAG

Testing: Jest, Vitest, React Testing Library, Playwright, ESLint, Prettier

Architecture: Code Splitting, Lazy Loading, Webpack, SSR/CSR/SSG, State Management, PWA

DevOps: Git, GitHub, GitLab, CI/CD, GitHub Actions, Vercel, Netlify, Docker, AWS, Heroku

Tools: Postman, Jira, Trello, ClickUp, Agile, VS Code, Cursor, Claude Code

Experience

Rigel AI

February 2025 - Present

Full Stack Developer

Lahore, Pakistan

- Built scalable Node.js/Express backend handling 10,000+ concurrent users with optimized RESTful APIs.
- Architected MERN applications with PostgreSQL and MongoDB, reducing database query times by 40%.
- Implemented JWT auth, payment processing, and real-time features with 25% frontend load improvement.

Createex

November 2023 - February 2025

React.js Developer

Lahore, Pakistan

- Developed React CMS platform serving 1000+ daily users with stable, scalable architecture.
- Built 50+ reusable UI components with Tailwind CSS, reducing development time by 30%.
- Integrated REST APIs with Redux state management, achieving 95% test coverage on critical modules.

Enigmatix

September 2022 - October 2023

Junior Frontend Developer

Bahawalpur, Pakistan

- Built 20+ responsive UI components with JavaScript and React, resolving cross-browser compatibility issues.
- Debugged production issues using Git workflows, reducing resolution time by 40%.
- Collaborated with senior developers on feature delivery pipelines, gaining hands-on Agile experience.

Projects

Shay Better Coaching | *MERN, Redux, PostgreSQL, Docker* | **Rigel AI, 2025**

- Built full-stack coaching SaaS serving 10,000+ users with Node.js backend, React frontend, and PostgreSQL.
- Optimized backend performance via database indexing and API caching, reducing load times by 35%.
- Implemented JWT authentication, payment processing, and scheduling system with workflow management.

Service Estimate | *MERN, React Flow, MongoDB* | **Rigel AI, 2025**

- Built full-stack plumbing platform managing 500+ workflows with Express backend and MongoDB.
- Developed React Flow visual builder with Node.js API enabling non-technical workflow configuration.
- Integrated booking system, real-time notifications, and form validation across client-server architecture.

Azam Electronics | *MERN, Supabase, GraphQL* | **Freelance, 2025**

- Built full-stack ecommerce platform for printer sales with GraphQL API and real-time inventory management.
- Designed 40+ accessible components and optimized Supabase queries for responsive product checkout.
- Implemented payment processing, order management, and real-time sync improving data consistency by 50%.
