Professional Summary

Full Stack Engineer with 4 years of experience building end-to-end web applications and production systems. Strong foundation in frontend development with hands-on experience across backend development, APIs, and both SQL and NoSQL databases. I enjoy turning complex requirements into reliable solutions and working closely with teams to build products that are scalable, maintainable, and effective. Experienced in modern web development practices and AI-assisted development workflows.

Education

COMSATS University Islamabad

September 2018 – May 2022

Bachelor of Science in Computer Science

Technical Skills

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Redux Toolkit, TanStack Query

Backend: Node.js, Express.js, REST APIs, TypeScript, SSR

Architecture: SSR / CSR / SSG, Code Splitting, Lazy Loading, Webpack

Devops: Git, GitHub, GitLab, CI/CD, GitHub Actions, Vercel, Netlify, Docker, AWS

Tools: Postman, Jira, Trello, ClickUp, Cursor, Claude Code, VS Code

Experience

Rigel AI

February 2025 – Present

Full Stack Engineer

Lahore, Pakistan

- Building and maintaining production SaaS applications across the frontend and backend, contributing to features throughout the development lifecycle.
- Working across APIs, authentication, application logic, and SQL and NoSQL databases to deliver reliable end-to-end features.
- Taking ownership of features from development to production, collaborating closely with product and engineering teams to solve problems and continuously improve applications.

Createex

November 2022 – January 2025

Frontend Engineer

Lahore, Pakistan

- Built and maintained React-based web applications and CMS platforms for production use.
- Developed reusable interfaces, integrated APIs, and collaborated with backend engineers to deliver reliable application features.
- Worked closely with designers and product teams to turn requirements into responsive, accessible, and user-friendly experiences while maintaining overall product quality.

Projects

Shay Better Coaching | *Next.js, TypeScript, Redux Toolkit, Node.js, PostgreSQL, Stripe*

- Built a production coaching SaaS with multi-role users, course scheduling, and admin-configurable dynamic forms.
- Led frontend, contributed to backend APIs authentication, installment purchases, and multi-channel SMS.
- Integrated Stripe and bank transfer payment flows with per-course configurable form structures.

Service Estimate | *Next.js, TypeScript, REST APIs, PostgreSQL, React Flow*

- Built a workflow-driven plumbing platform CMS controlled job configuration and automated quote generation.
- Led frontend, including the React Flow visual builder for non-technical admin service setup.
- Integrated booking, multi-step estimate form, and REST APIs alongside a dedicated backend engineer.

Azam Electronics | *Next.js, Tailwind CSS, Supabase*

- E-commerce storefront for printer sales with Supabase CMS for inventory and product management.
- Responsive product browsing via Next.js API routes and Supabase.
